BATTLE CREEK, MICHIGAN

1941 -- Hello, Everybody

We certainly did appreciate the way the orders for dahlias came in this last season and, best of all, the letters, later on in the autumn, telling us of the fine flowers they had produced and the great amount of pleasure received therefrom.

If we could have only stepped into every one of your gardens, and enjoyed with you, those beautiful and mammoth blooms, then it would have been a perfect dahlia year for us.

We expect, sometime, to call on some of you, when your flowers are at their best, and see your "beauties" and have a chat in dahlia lore. You are all invited to visit our gardens.

Sincerely yours,

Mr. and Mrs. A. H. Emmons.

General Description of Varieties of the WORLD'S BEST PRIZE-WINNING DAHLIAS

We specialize in dahlias that have a record of WINNING PRIZES; that are known to be vigorous, and have been thoroughly tested out in many sections of the United States.

Nearly every one of our dahlias has received a Certificate of Merit from the Trial Grounds at Storrs, Conn., or East Lansing, Mich. That means a rating of at least 85 per cent.

Healthy Dahlias

It is our policy—and we strictly adhere to it—that NO dahlia will grow in our gardens that shows ANY disease whatsoever. If a dahlia cost us a nice sum of money, it matters not. If it is NOT healthy, it is dug up and burned at once. We never purchase any stock from a dahlia raiser if we know he allows diseased dahlias to grow in his gardens.

*"We grow a number of the very best
And let, who will, raise all the rest."*

Dahlia Seed

Every dahlia grower who grows "seedlings" will tell you his greatest thrill is "watching" the "new" dahlia coming in bloom. Every new dahlia will be different from any other known variety.

Dahlia seed planted in the spring will commence to bloom in August, and continue until frost. It is not unusual to have blooms 10 to 12 inches across.

New seedlings of merit, that have few faults, are readily salable at worthwhile prices.

The dahlia seed we offer is the same high quality that we plant and from which we obtain our outstanding introductions. This seed is grown in the finest location in the United States, where the seasons are the longest, and that is in the extreme Southwest.

There are NO small varieties grown within a radius of several miles. Only the very LARGEST varieties.

If you find that you have a good seedling, please write us about it.

Fifty Dahlia Seed, \$2.75; 100 Dahlia Seed, \$5.00.

CUT FLOWERS

There are many dahlias that are excellent for cutting, and some will last a week, and be nearly as perfect as when plucked. The following list are the ones we consider the best for that purpose:

Purple Mist, Jersey's Beauty, Jane Cowl, Marshall's Pink, Cavalcade, Fairy, Queen City, Golden Standard, Jersey's Dainty, Laetare, Baby Royal, Hill's Pink Supreme, Darcy Sainsbury, and Lois Welcher.

The cut flowers that we sell each year from our dahlia gardens more than pay our running expenses.

PLANTS

We have found that if plants are started and grown properly, they will produce as good, if not better, results than roots.

All our plants are grown from base cuttings from selected stock, and grown in special containers, which are equivalent to about a four-inch flower pot.

We recommend planting out from May 10th to June 25th in this locality.

The size of the flowers and the height of the plants given in this catalog will vary in different locations. We give the approximate dimensions as they grew this last year in our gardens.

A Great Curiosity is the Sacred Lily of India

(Amorphophallus Rivieri)

This is a great novelty flower and is curious, interesting and unique.

Planted in the garden when you plant your dahlias, it produces an attractive plant that suggests a small palm—a single stem that is mottled green and white with purple and reddish shadings.

There are three palm-like branches bearing numerous small, lacy leaves. When the top is killed by frost, dig the bulb and store as you do your dahlias.

When this bulb becomes four or five years old, it will throw up a large stalk, in February or March, bearing at the top a very large Calla-shaped bloom, wine colored, ten to fourteen inches across, with a spadix that may be eighteen inches to two feet long. When this bulb blooms (it has a rather unpleasant odor) it requires no soil or moisture.

After the bulb once blooms, it continues to do so each year thereafter. Every bulb produces from two to five bulblets each year, besides growing to its normal size.

We never had any kind of a flower that attracted so much attention. Very few people ever saw anything like it.
